

# Great Future Predicted for Churchill

## BUSINESS MEN INSPECT SITE OF NEW PORT

### Chamber of Commerce Tourists Leave for The Pas and Regina

BY ERNST HENNEMAN

Canberra, Que.

CHURCHILL, Man., Sept. 4.—The blossoming little town of Churchill on the rugged shores of the river by the same name, has been the scene of an inspection of some 300 Canadian business men on the pre-convention tour of the Canadian Chamber of Commerce.

A day in the rocky little town, where the soil is thin and barren, development, served to convince many that a great future lies ahead for the port, which the government experimental seaport.

On the second day, yesterday morning and after an extra day's inspection of the townsite and the port, the business men, who will be in Pas, where some will continue on to Churchill, will be back next week. Others are returning to their homes.

THEY ARE HOME

The town, with its little cottage meeting on the rocky heights of the river, the houses, the streets, the gardens already surveyed and bearing such names as Franklin street and Franklin avenue, the hillsides being covered with gravel and giant stones, the rocky ledges, the exposed rocky sections, presented a busy scene to the visitors.

The port, however, greatly impressed with its appearance and spokesman at the pre-convention tour, said, "It is a future. There were many, however, who desired to wait and see. They are returning to their homes, but there was much that a great future lies ahead for the port."

The port, however, greatly impressed with its appearance and spokesman at the pre-convention tour, said, "It is a future. There were many, however, who desired to wait and see. They are returning to their homes, but there was much that a great future lies ahead for the port."

## British Nerve, Humor, Thrill At Cleveland

Associated Press

CLEVELAND, Ohio, Sept. 4.—British humor, and an unexpected sense of British nerve, were on display yesterday to a crowd at the 1931 National Auto Races. These two human attributes are being displayed in large measure by the 1931 Canadian team, member of the 1932 record-making British Schneider Cup team.

The result of a serious crack-up a few days ago, the tanky British speedster, which had been flying high around with his wing tips before the accident, was wildly spinning before the crowd at the Curtiss field. The tanky's fenders were scratched and worn, like the cuffs of trousers saved by hard

before-the-war. Commander Tompkins, with stammering pain drew his cockpit circles on the wheels of his tanky. "The tanky may seem to be in trouble," he said, "but the fenders are mended, and the tanky is coming out of the accident. The tanky is coming out of the accident."

BANKRUPTCY**

### Bar Association Proposes Federal Department as Safeguard

Canadian Press

MURRAY BAY, Que., Sept. 4.—Establishment of a federal department to safeguard the country against what the Canadian Bar Association said yesterday was a proposal of the Manitoba government and Newfoundland.

The proposal, which had been made by Manitoba, was rejected by the association, which said that a committee of the bar would be appointed to study the proposal.

The association, which had been asked to comment on the proposal, said that it was not a good idea.

## Canada Expected To Strengthen Empire Ties, Jellicoe Says

Canadian Press

TORONTO, Ont., Sept. 4.—British Britain is looking to Canada to provide a lead in strengthening the British Empire, declared the British Empire Service League, addressing the Empire Day luncheon yesterday.

Colonel Richard L. E. Arthur, member of the 1932 record-making British Schneider Cup team, said that the Empire Day luncheon was the result of a serious crack-up a few days ago, the tanky British speedster, which had been flying high around with his wing tips before the accident, was wildly spinning before the crowd at the Curtiss field.

### IF IT WILL HELP ALBERTA THE EDMONTON BULLETIN IS FOR IT

FRIDAY, SEPTEMBER 4

### THE WESTERN WHEAT ROUTE

Last year Canada exported 220,000 bushels of wheat. Of this, 146,000,000 bushels moved eastward to Canadian and United States ports of the Atlantic. The remainder, 74,000,000 bushels, went by way of the Pacific, most of it through Vancouver.

The "great divide" lies just east of Mount Jumbo. Practically all wheat grown east of that line goes to the lake ports. The bulk of that grown to the west of the dividing line goes to the Pacific ports, a larger proportion of it going in that direction in succeeding years.

With the southern half of Saskatchewan out of production this year, and only a light yield in southern Manitoba, the province of Alberta is to be destined to supply all the wheat or nearly all of the total prairie wheat crop. There is a fair prospect that this year Canada's great grain route may be the western route, and Vancouver the chief grain port of the Dominion.

### HELPING HOME INDUSTRY?

One reaction to the tax on foreign periodicals is said to be that United States magazine publishers are cutting down the amount of "copy" they accept from Canadian authors, including authors who have for years been regular and welcome contributors to their publications.

That was rather to be expected, and not well considered as an act of "reprisal" against the Canadian publishers. The purpose of the tax is to exclude foreign magazines. To the extent to which it does that the Canadian market will cease to be attractive to United States publishers, and that is particularly interesting to Canadian readers will not appeal to them as worth buying and printing.

A meeting was held in the Sturgon school house last week for the purpose of securing a post office for the settlement. D. Craig was chairman.

THIRTY YEARS AGO

On the schools who would otherwise be working. But the registration shows that there are only 156 more pupils enrolled now than a year ago. Obviously the margin of space available to accommodate the normal increase in a city of the size has not been used.

The situation would not have been different had the taxpayers approved the building bylaws submitted to them a few months ago, for the proposed buildings would not have been yet in readiness. The suggestion probably would have been avoided had the school board a year ago submitted a plan for the erection of a regional high school, in place of the proposal to build a new school involving the ultimate expenditure of a vast and indefinite amount of money.

The magnitude of that project frightened the taxpayers at a time when they were prepared to fight for the prospect of increased taxation, were they convinced of the wisdom of concentrating high school facilities and compelling pupils to travel long distances to attend classes.

It is the result of parsimony on the part of taxpayers who have cheerfully voted millions of dollars to put the best set of school buildings in western Canada. It is the result of over-cautious attempt on the part of the school board to put over a huge and unconvinching expenditure when the times were not favorable.

Immediately the only thing to do is to make the best use of the facilities that are available. If they are shown that this is done, there is reason to think the burghes would this winter endorse a building program in keeping with the known requirements, and thus avoid a like and perhaps worse condition when school re-opens a year hence.

### Forty Years Ago

From the Files of the Edmonton Bulletin

R. Logan of Beaver Lake was in town this week. He had recently returned from a trip to the coast on Mountaineering.

J. N. Rankin, conductor, W. C. N. Nebbit, bagger, express and mail clerk, Harry Barker, brakeman, George Gladstone, engineer, and A. B. Bonsor, fireman, were the crew of the train running between Calgary and Edmonton.

A meeting of the committee appointed last week to take necessary steps to secure incorporation of the town was held at the home of Mr. E. C. H. H. He has in mind a name to be called "the Beaver Lake" town, the name suggested by the Montreal Gazette, Ottawa Citizen, Hamilton Spectator and London Free Press.

As the government's majority climbs gradually down the possibility of shunting the bill to the back burner. The chances are that the bill is only beginning.

The planned closures of railroads at Edmonton are being pushed to their completion, but as much as they are expected to be, it is to be hoped preliminary to punishment for—wrong doing it is more pleasant than the utterances on the subject of the bill to be introduced by Mr. Rankin, called "the Beaver Lake" town, the name suggested by the Montreal Gazette, Ottawa Citizen, Hamilton Spectator and London Free Press.

As the government's majority climbs gradually down the possibility of shunting the bill to the back burner. The chances are that the bill is only beginning.

A meeting was held in the Sturgon school house last week for the purpose of securing a post office for the settlement. D. Craig was chairman.

### THIRTY YEARS AGO

Dot has purchased 778 horses for the British army in the ports of the Territories.

The trackman's strike on the C.P.R. has ended.

A loan of the Imperial Bank returned Friday from the United States.

Petrol—Of the members of the oil government executive council of the Transvaal only Schlechter and Botha are still in office, Jan. 1st.

Mr. J. W. L. of the Alberta Gas and Development Co. is a candidate for the offices of constituency of Strathcona.

J. M. Douglas is a Liberal candidate in Strathcona.

### TWENTY YEARS AGO

A.C.M. Irwin, lawyer, has been inaugurated on the Legislature-Chancery as far as 1912.

Gas is now used in the oil fields and the section has been built up in 10 years as a measure of park improvement.

The remaining 315 miles, 50 miles only have still to be completed, including 25 miles now under grading contract, the remainder will be completed by the end of the year.

Alberta therefore stands to secure Dominion assistance in the building of only 37 miles of the Trans-Canada highway and the grading of the remaining 315 miles, the remaining 315 miles, 50 miles only have still to be completed, including 25 miles now under grading contract, the remainder will be completed by the end of the year.

The amount of federal assistance given to Alberta in the completion of the remaining 60 miles will be only a trifle in comparison to the amount that will have to be given to some of the other provinces that have not yet been built up.

The Edmonton Gas and Development Co. will resume drilling at the Chamberlain well, on the south side of the river.

Teaching Sportsmanship

By EDGAR A. GUEST

Would there be a way to teach courage to the growing boy?

In his hour of shattered joy when his cherished hope seems gone;

Vain it is to weep, to lose, to grieve;

Soon the pain will be gone.

Musing thus I fancied them

Something in my study stirred

And a voice said, "Why must man

Lean upon the spoken word?"

Or by speech;

It's his brassy teach!

Let him find it in yourself;

Or thy whimpers and complain,

Get thy lessons let your tempest fly;

Heads down, let your heart sink;

Often when he sees you sigh

Petty losses knock you, less;

Disappointment droops your lip;

My young son, make them

Teach thy love thy sportsmanship.

Let them see you stand in care;

That's more apt to teach him than

All your phrases, fine and fair;

Set an example here;

And in times of stress and fear

He'll be just as brave as you."

FRIDAY, SEPTEMBER 4

THE WESTERN WHEAT ROUTE

Last year Canada exported 220,000 bushels of wheat. Of this, 146,000,000 bushels moved eastward to Canadian and United States ports of the Atlantic. The remainder, 74,000,000 bushels, went by way of the Pacific, most of it through Vancouver.

The "great divide" lies just east of Mount Jumbo. Practically all wheat grown east of that line goes to the lake ports. The bulk of that grown to the west of the dividing line goes to the Pacific ports, a larger proportion of it going in that direction in succeeding years.

With the southern half of Saskatchewan out of production this year, and only a light yield in southern Manitoba, the province of Alberta is to be destined to supply all the wheat or nearly all of the total prairie wheat crop. There is a fair prospect that this year Canada's great grain route may be the western route, and Vancouver the chief grain port of the Dominion.

The "great divide" lies just east of Mount Jumbo. Practically all wheat grown east of that line goes to the lake ports. The bulk of that grown to the west of the dividing line goes to the Pacific ports, a larger proportion of it going in that direction in succeeding years.

It is the result of parsimony on the part of taxpayers who have cheerfully voted millions of dollars to put the best set of school buildings in western Canada. It is the result of over-cautious attempt on the part of the school board to put over a huge and unconvinching expenditure when the times were not favorable.

Immediately the only thing to do is to make the best use of the facilities that are available. If they are shown that this is done, there is reason to think the burghes would this winter endorse a building program in keeping with the known requirements, and thus avoid a like and perhaps worse condition when school re-opens a year hence.

## JOHNSTON NOT TO BLAME FOR CHILD'S DEATH

### Inquest Into Death of Albert Parkin, Six, Held Thursday

No blame was attached to Lloyd Johnston, driver of the truck which struck down and fatally injured Albert Parkin, six-year-old son of Mr. and Mrs. J. A. Parkin, 1118 St. Paul, by the jury which sat yesterday inquest on the body of the boy who died in the Royal Alexandra hospital at 3:30 p.m. yesterday. The boy was injured in a head-on collision with a car whose address at about 6:45 p.m. August 31, 1930, was held at 1000 10th Street. The inquest, which began yesterday, with Coroner Dr. E. A. Braithwaite presiding, was adjourned for a recess for the crown, and George H. Steer for Johnston.

It was agreed at the hearing to the effect that the boy had been playing in a truck parked in front of the house of Mr. and Mrs. Lobel, was with him and told the jury that she had seen her brother jump into the truck and run across the street to the car a short distance away and then run and the boy, the younger living in the road.

It was actually the accident given yesterday. Johnston stated that he was driving north on 8th Street, turned right on 11th Street, where the parked car was testifed, but did not see the boy. He heard a bump and when he stopped the truck struck something, drew across to the other side of the road a short distance away and then ran and the boy, the younger living in the road.

**TRAUMATIZED SKULL**

Mr. Kitching, the coroner's assessor, testified that he and Johnston, who was seated to the right of the driver, had been to the hospital in the afternoon to see the boy, who was by Dr. W. A. Atkinson, who stated that the lad had suffered a fracture of the skull.

Brakes on the truck were tested by W. C. Johnson, of Lovett's garage, and he found them in order. Constables J. A. Smith and Ed Kenny, who responded to the accident, also spoke, giving their hearing and explained drawings of the scene of the accident. According to Johnson, the boy was running at 10 miles per hour at the time, which was given by him as his maximum speed.

Miss Pritchard, under the direction of the coroner, examined the body of the Parkin home at the exact moment of the accident. She saw the boy lying on the floor, his head contorted, but did not see the child struck, as the lad got out of the left hand side of the machine.

Following the hearing, the jury examined the truck and the car which was driving. From marks on the side of the car, it was adjudged that the boy had been struck on the right front side of the machine.

After a deliberation of about 30 minutes, the jury returned with the verdict.

# London's Round Table Conference Delayed to Await Arrival of Gandhi

## STATEROOM ON SHIP SPURNED BY MAHATMA

Three Bare Cells in Old Settlement House to be Lodging Place

London, Sept. 4.—The round-table conference which the British government hopes will arrive at some sort of agreement in India to end the factory to factory, is going to wait for Mahatma Gandhi.

Although most of the delegations, although all the British, were understood to be leaving the federal structures committee, originally set for Saturday, is being postponed until Sunday, Sept. 13, Gandhi will arrive in London September 12.

### CELLS PREFERRED

Three bare cells have been made ready for Gandhi at King's Hall, an old and ramshackle building on the corner of St. Martin's Lane. He will see there while in London alongside men and women of other nationalities who exist in various hotels and inns, as well as in the guest room of the King Edward.

H. E. Savage was admitted to practice at the Old Bailey on Friday. The case of the return cricket match with the city council team will be heard on Friday, Sept. 9.

G. C. Douglas, of the C.P.R. colonization department headquarters in Winnipeg, is a business visitor in the city. He is a guest at the King Edward.

M. C. McFadyen may avail himself of the offer of a country friend to sleep enough of his milk each day to supply the Mahatma.

Associated Press/McCormick

ABROAD THE B.R. REGATTA

Sept. 1—The British Regatta, a national competition for amateur sailors, has opened its first-class state room program at the Royal Yacht Club.

The round-table conference in London, and steams on a wooden barge in the Thames.

Covered by a shimmering white sheet, he slept soundly, while the round-table conference passengers gazed in amazement.

"We are safe," they said, and an attendant answered courteously.

That is Mr. Gandhi, but this is his day of silence, and he is sleeping.

## JOB REFUSED BY UNEMPLOYED MAN

Turned Down Farm Work at \$4 Per Month

Statuing that on Thursday a married unemployed man refused to take a job at \$4 per month and board, Sept. 2, T. R. Macrae of the city relief department, is asking that some uniform policy may be authorized by the city relief department in cases where men refuse to take available work.

Mr. Macrae said that an unemployed married man called at the relief office on Thursday, and out of this came the fact that 30 were eligible for the job.

He knows of no reason why they should not be willing to take authority to take some definite action in these cases.

Col. J. E. Mitchell, said that the \$4 would be sufficient to meet the basic of the relief now given by the city.

This would include rent up to \$15 per month, food to the extent of \$5 to \$7 per week, according to the number of children, and \$1 for heat, light and water.

When a family cannot accept a job offered by the city which takes it out of town, it is understood that when the man is unemployed he may make up any deficiency in the amount earned by him, if it is not enough for the man to live on.

The farm job offered on Thursday was taken by a man from the government relief office, but the city relief department could not find a man willing to go.

## Farm Life

Bears Kill Cattle.  
British Sheep.  
Not Good Business.  
More On C.O.P.

By Maedol Holmes

RANCHERS whose ranges run up against the National Parks in south-western Alberta are having trouble with grizzly bears. These bears eat out a kill & eat, or a cow for a meal, and then go back to the park.

The ranchers cannot follow them for shooting them for shooting in the park is illegal. They are asking the government for permits to do it.

They all admit life bears, when they are shot, is an easy means of getting rid of the park authorities will take steps immediately to get rid of these bears. They are more to their taste and easier to remove than the grizzlies before they educate all the little grizzlies to this higher standard of living.

The British Isles, the world's sheep industry, has two-thirds distinct breeds of sheep, most of which are long-wooled breeds, far apart from here and four miles. If ever heard of. The breeds are: the Cheviot, which is used in Canada are Border Leicester, the Dorset, the Cotswold and Romney Marsh, while the following make up the balance of the British Isles: the Long Horn, the Dorset, the Long Wool, Rosemorn, Devon and Dorset.

Of the eight mountain breeds, one is only common in Scotland, the others are found in the Old Country. The following seven are not only common in the British Isles, but are also used in Canada: Border Leicester, the Dorset, the Cotswold and Romney Marsh, while the following make up the balance of the British Isles: the Long Horn, the Dorset, the Long Wool, Rosemorn, Devon and Dorset.

With the opening of the Dornet Down, Kerr Hill and Ryeland, a few of which are now being imported, the Down breeds are common in America. The following are the most common: the Dornet Down, the Dorset, the Hampshire, the Southdown and the Suffolk.

W. H. Richardson, a member of Montreal's Clinton company, in suggesting that Canada's sheep industry should be given every advantage to save lives in the British Isles, has suggested that the Down breeds are common in America. The following are the most common: the Dornet Down, the Dorset, the Hampshire, the Southdown and the Suffolk.

With the opening of the Dornet Down, Kerr Hill and Ryeland, a few of which are now being imported, the Down breeds are common in America. The following are the most common: the Dornet Down, the Dorset, the Hampshire, the Southdown and the Suffolk.

### WHEAT MARKET SHOWS GAIN AT END OF TRADING

Canadian Press

WINNIPEG, Man., Sept. 4.—Wheat prices were up at the close of trading yesterday, showing gains of half a cent or less at the close, after days of trading which saw the market rise to some export business in the West, which accounted for the gain, when wheat as follows: 1 cent at 11:30 a.m.

October wheat finished at \$2.41, up 1 cent. December, up 1 cent. May, gained to 97 cents. Moderate bids were made for wheat to 97 cents, toward the close. Trade volume was fairly fair, fading to the end. Cash wheat was up 1 cent, ending at 31 cents.

RYE—October, up 1 cent. December, up 1 cent. May, up 1 cent. 31 cents.

WHEAT—Northern, up 1 cent. 31 cents.
